Analysis of a completed deal. Not financial advice.

Cash-flowing American homes, for investors worldwide.

The thesis behind this deal, in one line: buy homes that pay rent quickly, in states that are fair to owners.

Shri Properties, a Wyoming LLC, is building a global real estate investment platform for investors worldwide. All operations, property management and servicing are handled in the US: we buy single-family homes in landlord-friendly states, pay in cash, and run each home on the ground.

01 **Cash flow first**

Buy homes that rent quickly, so income starts within months, not years.

02 **Landlord-friendly states**

Simple rules for owners and low entry prices — Ohio here, at $75,000.

03 **All cash, no loan**

No lender, no interest bill, no pressure to sell at the wrong time.

HOW THE OPERATION RUNS

1 **Investors worldwide**

From any country; they fund and own the home

2 **Shri Properties, in the US**

Finds, buys and oversees; B2B Realty manages locally

3 **The home**

Cleveland, Ohio · single-family · rented

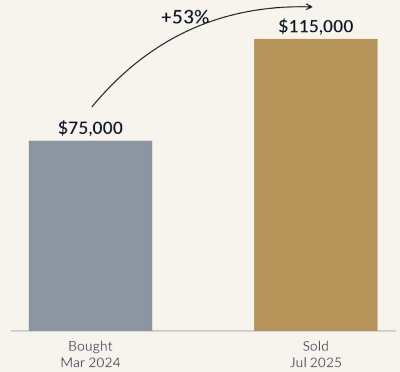

4 **Rent back**

Paid monthly, net of agent fees
